Research Interest

Exploration and Test-Time Learning in LLM Agents. My research works toward enabling machines to learn with agency: what a model learns from matters, but who decides what it learns from is the fundamental question. From this perspective, I study how agents can learn from their own experience by actively gathering the information they lack and turning what they find into better behavior over time. This motivates two complementary directions in my research. (i) Exploration: I study how an agent in an unfamiliar environment gathers information to discover new rules and structures, rather than prematurely relying on pretrained priors. (ii) Test-time learning: I study how an agent transforms this exploratory experience into iterative self-improvement, learning directly from interaction to achieve superhuman performance.

Education

KAIST, The Kim Jaechul Graduate School of AI (KAIST AI) — Seoul, Korea
M.S./Ph.D. in Artificial Intelligence — *Aug. 2026 – Present*
Advised by Prof. Hyunwoo Kim

Korea University — Seoul, Korea
B.S. in Computer Science; GPA: 4.43 / 4.5 (4.5 / 4.5) — *Mar. 2019 – Feb. 2026*
Graduated Summa Cum Laude from the College of Informatics, ranked 1st out of 212.

Experience

Upstage — Seoul, Korea
AI Research Engineer Intern — *Mar. 2026 – Aug. 2026*
Worked on the coding capabilities of the Sovereign AI models as part of the SWE Agent team

Multimodal Interactive Intelligence Laboratory (MIIL) — Seoul, Korea
Undergraduate Researcher (Advised by Prof. Paul Hongsuck Seo) — *Mar. 2024 – Jul. 2024*
Worked on efficient representation learning through model-based supervision

Publications (* Denotes equal contribution, † Denotes corresponding author)

Solar Open 2 Technical Report — *arXiv*
Upstage Solar Team

ReSCORE: Label-free Iterative Retriever Training for Multi-hop Question Answering with Relevance-Consistency Supervision — *ACL 2025*
Dosung Lee*, Wonjun Oh*, Boyoung Kim, Minyoung Kim, Joonsuk Park†, Paul Hongsuck Seo†

Awards & Honors

Summa Cum Laude *2026*
Korea University

IPESK Next-generation Engineers *2025*
Institute for Promotion of Engineering and Science of Korea

Silicon Valley Program Scholarship *2025*
College of Informatics, Korea University

Competitions

2nd Prize ($3,000) *2025*
Qwen SKYST Hackathon

Gold Prize (KRW 2,000,000) *2025*
Korea University Software Contest

NIA Director's Award (KRW 3,000,000) *2024*
Korean AI Contest

Extracurricular Activities

Club President *Jun. 2023 – Dec. 2023*
AIKU (Korea University AI Club)
